

DEPARTMENT OF SURGICAL ONCOLOGY

Urology Unit

Introduction

The uro-oncology unit of our hospital deals with all types of urological malignancies. We take care of both the referred as well as new patients. Two consultants (one Nepalese, one Chinese), one registrar and two medical officers work in the unit. In the unit, both open as well as endourological procedures are being performed regularly. Apart from dealing with the urological malignancies, this unit has also been managing colorectal and other malignancies for the benefit of our patients.

Academic activities

For higher training (Fellowship) consultant Dr. Nirmal Lamichane went to Reigmore Hospital, Scotland, UK.

As a part of academic activity resident from

the medical colleges are posted to our unit. These residents take active part in OPD and indoor.

7.	Partial Penectomy with Groin dissection	34	15.	Others	13
8.	Orchidectomy	24			

Future Plans

Our future plan is to continue providing more services and extend the services as far as possible. We are planning to gradually increase the number of laproscopic surgeries for our patients with the help of Chinese medical team. We are also planning to increase the number of surgeons for more services.
